Professional Profile

Computer Engineering graduate from Tecnológico de Costa Rica with hands-on experience designing and building complete software systems across web, mobile, backend services, and cloud integrations. Strong foundation in software architecture, data management, API design, and system integration through academic projects and real client engagements. Characterized by adaptability and a demonstrated capacity to quickly understand and apply new technologies in collaborative environments to deliver practical and maintainable solutions.

Technical Skills

- **Development Areas:** Web Applications, Mobile Applications (Android), Backend Services, REST APIs
- **Languages:** JavaScript, TypeScript, Python, Java
- **Web Fundamentals:** HTML, CSS
- **Frameworks & Technologies:** React, Angular, Tailwind CSS, Node.js, Express, FastAPI, SQLAlchemy, Android SDK
- **Databases:** PostgreSQL, SQLite, MySQL, SQL Server, Cloud Firestore
- **Tools & Workflow:** Git, GitHub, Postman, Agile methodologies (Scrum), Jira, Trello, VS Code, Android Studio
- **Cloud & Services:** AWS S3, Firebase (Cloud Storage, Firestore)
- **Additional experience:** C#, Go, C++

Experience

- **ProSTEAM — Full-Stack Developer (Institutional Project - Professional Practice)** Aug 2025 – Dec 2025
Instituto Tecnológico de Costa Rica
 - Continued the development of an existing institutional platform for the **ProSTEAM program** at the Instituto Tecnológico de Costa Rica.
 - Implemented new features for academic event management, participant registration, automated certificate generation, and a news module, based on real institutional requirements.
 - Designed and implemented **RESTful APIs** using **Node.js** and **Express**, integrated with **Cloud Firestore** for event and user management.
 - Built the frontend interface using **Angular** to consume backend services and provide dynamic user interactions.
 - Continued improving the inherited codebase after the project period by refactoring and modularizing the architecture to enhance structure, readability, and maintainability.

Technologies: Angular, Node.js, Express, Firebase (Cloud Firestore)
Repositories: [Frontend](#) | [Backend](#)

Academic Technical Projects

- **HealthFlow — Personal Health Dashboard**
 - Built a full-stack health tracking platform with authentication, CSV data import, and interactive visualization of health metrics over time.
 - Designed and implemented multiple **RESTful API endpoints** using **FastAPI** and **SQLAlchemy ORM** for secure data access and processing with a relational database.
 - Developed a responsive **React** dashboard using **Tailwind CSS** and **shadcn/ui** components, enhanced with **Framer Motion** animations and **Recharts** visualizations for interactive health metrics tracking.

Technologies: React, FastAPI, SQLAlchemy, SQLite, Tailwind CSS, shadcn/ui, Recharts, Framer Motion
Repository: [GitHub](#)

- **OnStream — Multimedia Streaming System**

- Designed and implemented a multimedia streaming system based on a client–server architecture with real-time communication using **WebSockets**.
- Developed backend services to coordinate media catalogs from local storage and **AWS S3** for cloud-hosted multimedia assets.
- Built an interactive frontend with dynamic content catalog, search, and an in-page media player.

Technologies: Node.js, Express, WebSockets, AWS S3, HTML, CSS, JavaScript

Repository: [GitHub](#)

- **PureHarvest — Mobile Marketplace for Coffee and Organic Producers**

- Developed a **native Android application** enabling producers to manage product listings and interact with customers, based on real client requirements.
- Implemented navigation to business locations using Android Intents to open external map applications (Google Maps, Waze) and supported a bilingual UI (English/Spanish).
- Integrated **Firebase** for real-time data storage and implemented dynamic UI states with efficient media handling for mobile environments.

Technologies: Android SDK (Java), Firebase (Cloud Storage, Firestore)

Repository: Private (available upon request)

Education

Instituto Tecnológico de Costa Rica (TEC)

Bachelor's Degree in Computer Engineering — 2026

Languages

- **English** (C1 – BELT English)
- **Spanish** (Native)

Soft Skills

- Analytical problem-solving
- Proactivity and adaptability
- Teamwork and collaboration
- Clear communication and idea sharing
